SUMMARY

Frontend developer with hands-on experience building responsive, accessible web interfaces using HTML5, CSS3, and JavaScript. Comfortable turning designs into clean, component-based, mobile-first layouts. Currently strengthening React.js through applied projects, and looking for an entry-level Frontend Developer role to contribute to a professional development team.

SKILLS

Languages & Core: HTML5, CSS3, JavaScript (ES6+)

Frameworks & Libraries: React.js (in progress), Bootstrap, Tailwind CSS

Layout & Design: Flexbox, CSS Grid, Responsive Design, UI/UX Basics

Tools: Git, GitHub, Chrome DevTools, VS Code

EXPERIENCE

Web Development Intern — CodeAlpha (Remote) (2026, 1 Month)

- Completed a 1-month remote internship focused on frontend web development, delivering 3 hands-on tasks using HTML, CSS, and JavaScript.
- Built a responsive personal portfolio website with multi-page layout and animations (see Portfolio Website under Projects).
- Developed an interactive image gallery with JavaScript-based filtering/lightbox functionality.
- Built a fully functional calculator implementing DOM manipulation, event handling, and JavaScript logic for arithmetic operations and input validation.

PROJECTS

Portfolio Website — [Live Demo](#) | [Code](#)

- Built a modern, multi-page personal portfolio with HTML, CSS, and JavaScript, including About, Skills, and Contact sections.
- Implemented fully responsive layout tested across mobile and desktop breakpoints, plus custom CSS animations for smoother navigation.

Image Gallery — [Live Demo](#) | [Code](#)

- Created a responsive image gallery with JavaScript-based filtering and lightbox view, built during the CodeAlpha internship.

Calculator — [Live Demo](#) | [Code](#)

- Built a functional calculator app using vanilla JavaScript, covering event handling, DOM manipulation, and input validation.

Landing Page — [Live Demo](#) | [Code](#)

- Developed a responsive marketing landing page using HTML, CSS, and Flexbox.
- Added hover effects and smooth transitions to improve visual polish and user experience.

To-Do App — [Live Demo](#) | [Code](#)

- Built a task management web app with add, delete, and mark-as-complete functionality.
- Used vanilla JavaScript for dynamic DOM manipulation and local state handling, with a clean, user-friendly interface.
